

Declaration on the REACH Regulation

European Community Regulation on Chemicals REACH - Registration, Evaluation, Authorisation and Restriction of Chemicals

On June 1st 2007, regulation (EC) No. 1907/2006 (REACH) has entered into force. Until the first phase-in deadline of December 1st 2010 all substances with a yearly volume of >1000 tons had to be registered at the European chemicals Agency ECHA in Helsinki.

Until the second phase-in deadline of June 1st 2013 all substances with a yearly volume of >100 Tons have to be registered.

Symalit AG is a downstream user and only manufactures articles which do not intentionally release chemical substances. Registration therefore is not required.

Nevertheless, Symalit AG implements the REACH regulation, also in keeping the interest of the customers in mind. Thus, we ask our suppliers to register products, which fall under the REACH regulation, including their uses, or to pass this requirement onto their sub-suppliers. This supplier requirement is included in the relevant Symalit AG documents.

The products manufactured by Symalit AG do not contain any SVHC (substances of very high concern), which appear on the current candidate list or on the current list of substances subject to authorisation according to annex XIV of the REACH regulation.

The Symalit AG products are articles. Safety datasheets according to article 31 of the REACH regulation are not required. However Symalit AG provides information to ensure safe use of their products on request.

On the basis of the above mentioned procedure, Symalit AG declares to exclusively deliver products into the European Community which comply with the REACH regulation.

This document and any data and specifications presented on our website shall provide promotional and general information about the Plastic Products manufactured and offered by Symalit AG and shall serve as a preliminary guide. All data and descriptions relating to the Symalit-Products are of an indicative nature only. Neither this brochure nor any data and specifications presented on our website shall create or be implied to create any legal or contractual obligation. Any illustration of the possible fields of application of the Symalit-Products shall merely demonstrate the potential of these Symalit-Products, but any such description does not constitute any kind of covenant whatsoever. Irrespective of any tests that Symalit AG may have carried out with respect to any Symalit-Product, Symalit AG does not possess expertise in evaluating the suitability of its materials or Symalit-Products for use in specific applications or products manufactured or offered by the customer respectively. It thus remains the customer's sole responsibility to test and assess the suitability and compatibility of Symalit-Products for its intended applications, processes and uses, and to choose those Symalit-Products which according to its assessment meet the requirements applicable to the specific use of the finished product. The customer undertakes all liability in respect of the application, processing or use of the aforementioned information or product, or any consequence thereof, and shall verify its quality and other properties.
